"string"

The screenshot shows a Visual Studio Code editor interface. The Explorer sidebar on the left displays the file structure with 'Ecommerce_API.py' and 'requirements.txt' under the 'CLOUD_API' folder. The main editor area shows 'requirements.txt' with the text 'uvicorn'. The Terminal panel at the bottom displays a curl command and its output:

```
(base) matlab@sjt318scope053:~/cloud_api$ curl -X 'POST' \
'http://127.0.0.1:8000/discount_vendor_info' \
-H 'accept: application/json' \
-d '{ "product_id": 1, "name": "Product Name", "price": 499 }'
{"message": "10% discount available from ElectroMart for Product Name."}(base) matlab@sjt318scope053:~/cloud_api$
```

The status bar at the bottom indicates the current file is 'requirements.txt' at line 4, column 8, with 4 spaces, UTF-8 encoding, and LF line endings. It also shows icons for Live Share, BLACKBOX Agent, and Open Website.
